

WE DELIVER.

Engineering, Training and Simulation Excellence.

About CymSTAR

As a trusted training systems integrator, CymSTAR provides engineering, training services and simulation products for all branches of the U.S. Armed Forces, Allied nations, and leading organizations in the aerospace industry. We principally engage in the modification, upgrade, design, development, integration and sustainment of training systems.

Our engineering expertise equips our customers with innovative, tailored solutions that prepare them to perform complex operations at the highest level of proficiency to accomplish their most critical mission — ensuring security.

At the heart of CymSTAR's operations is a compact yet dynamic workforce exceeding 200 dedicated employees within the United States. We boast an unwavering reputation for delivering quality training systems and services that consistently adhere to stipulated timelines and financial allocations.

History of Excellence!

CymSTAR solves some of the world's most complex engineering and integration challenges supporting the mission readiness of our nation's warfighters.

CymSTAR was formed on the principle of delivering customer excellence in all we do. Over the years, we have built a solid reputation for providing excellent customer care by consistently meeting our commitments. Our proactive approach to customer focus includes identifying opportunities to extend value and capability to our clients and end users.

Our Mission

Our mission is to deliver a superior customer experience through engineering excellence, innovative training products and services stemming from the pillars of our unique culture - Integrity, Accountability, Customer Focus and Innovation.

Company Facts

- Veterans and engineers founded the company on June 26, 2003.
- Many of the company's senior leaders, including the CEO, are U.S. Air Force veterans.
- CymSTAR employs over 120 personnel in the greater Tulsa region of Oklahoma.
- CymSTAR's primary customers include the U.S. Air Force, U.S. Navy, U.S. Army and U.S. Marine Corps.
- CymSTAR has delivered more air refueling training systems than any other company.
- An employer of choice - CymSTAR has positions available in Oklahoma and other states.

Who We Serve

Accelerating mission readiness and improving warfighter training and safety.

Air Forces

For over two decades, CymSTAR's simulation products, training and engineering services have safely prepared Air Force aviators and maintenance crews to execute their missions in the most challenging circumstances successfully. We are the Prime contractor on the A-10, C-5 and E-4B Aircrew Training Systems.

Marine Corps

CymSTAR has modified U.S. Marine Corps (USMC) C-130 and AV-8B training systems. Additionally, we have designed, developed and delivered machine gun simulators for use on USMC live fire ranges.

Naval Forces

For the past 15 years, CymSTAR has provided simulation products and engineering services to prepare naval aviators to be the best of the best on their unique missions at sea.

Land Forces

CymSTAR has developed and maintained various training systems for the U.S. Army. We delivered helicopter door gunnery and hoist training systems and managed depot-level maintenance for live fire range systems.

Foreign Military Sales

Under the U.S. Government's Foreign Military Sales (FMS) program, CymSTAR developed and produced new training systems and provided engineering services and systems integration capabilities to upgrade and modify existing training systems for allied forces.

What We Do

We support the mission readiness of our customers by providing solutions for a range of platforms, including airborne command center, tanker, transport, fighter, reconnaissance and rotary-wing aircraft.

Our offering includes:

Training Services

Engineering Capabilities

Training Systems
Integration

Simulation Products

Program Examples

- E-4B Aircrew Training Center in support of pilot and flight engineer training for the USAF 595th Command & Control Group.
- KC-135 Boom Operator Weapons System Trainers (BOWSTs) were delivered to the USAF Air Mobility Command to train boom operators in air refueling.
- A-10 ATS prime contractor performing concurrency modification of USAF A-10 ATDs.
- C-5 MATS Maintenance Trainer upgrades for the USAF.
- Prime contractor operating and upgrading the USAF C-5 ATS.
