

E-4B TS Provider

Elevate your training experience with CymSTAR, your premier E-4B Training System (TS) Provider.

Overview

CymSTAR is the Prime Contractor responsible for the complete E-4B TS program that produces highly skilled aircrew and maintenance technicians for the USAF 595Th Command and Control Group under the Eighth Air Force and Air Force Global Strike Command (AFGSC). CymSTAR delivered a complete training system, including a new facility near Offutt AFB in La Vista, Nebraska.

The E-4B training program incorporates realistic flight training, including air refueling. Due to aircraft availability limitations, this skill is challenging and expensive to train in actual flight. The E-4B TS delivers initial qualification, requalification, upgrade, and recurrent training for pilots and flight engineers and practical task training for ground maintenance technicians. The realistic training system reduces the need for limited aircraft assets or costly and inefficient commercial training.

The "Doomsday" Aircraft's Mission

The E-4B is the National Airborne Operations Center (NAOC), a critical National Military Command System component. In the event of a national emergency or destruction of the ground military command and control centers, the aircraft provides a highly survivable command, control and communications center to direct U.S. forces, execute emergency war orders and coordinate actions by civil authorities.

CymSTAR's E-4B training center offers the Air Force a cost-effective, safer, and mission-representative means to train aircrews supporting the Joint All-Domain Command and Control mission.

CymSTAR's Contracted Services

Under the terms of the contract, CymSTAR is delivering a suite of E-4B training solutions, including:

- Training Center Management and Operations
- High-Fidelity, Full-Motion E-4B Flight Simulation
- FAA & USAF Approved E-4B Courseware
- Expert Academic and Simulator Instruction
- Proactive Simulator Upgrades and Maintenance

As the Prime Contractor, CymSTAR proudly executes the E-4B Training System services, showcasing the USAF's trust in small businesses to deliver the full scope of training requirements. CymSTAR is fully capable of preparing USAF E-4B aircrew and maintenance technicians for the successful execution of E-4B strategic mission.

**Maximizing fleet
availability for operations
while producing highly
skilled aircrews ready to
perform their mission-
critical duties.**
